

1. EXECUTIVE SUMMARY & SYSTEM SCOPE

Orbit HRMS is the enterprise Human Resource Management System built on Google AppSheet integrated with Google Cloud backends and Google Workspace (Gmail notifications & automated emails), engineered by **OmmNoMi** for BLR WORLD. Replacing Zimyo in March 2024, Orbit serves cross-border employees across UAE, Qatar, and KSA. This report presents a complete operational audit of March–July 2024 development, documents all Phase 1 & Phase 2 delivered capabilities, analyzes iterative user feedback loops, and outlines the **Phase 3 Strategic Roadmap and OmmNoMi Enterprise Remote Managed Services & Extended Workforce Solutions**.

MAJOR WORKFLOWS DEPLOYED

2. COMPREHENSIVE WORK SUMMARY (PHASES 1 & 2 DELIVERED)

2.1 Attendance & Geolocation Tracking Module

Engineered strict geolocation check-in enforcement across office and remote work modes. Integrated grace periods, late check-in detection, anti-spam rate limiting, and midnight-crossing shift offset calculations to maintain exact attendance logging.

- **Office vs. Remote Modes:** Smart check-in locking prevents mode switching after check-in to ensure data integrity for payroll.
- **Geolocation Enforcement:** Mandatory GPS coordinates captured at clock-in via Chrome and mobile apps.
- **Midnight Shift Logic:** Overnight shifts crossing midnight calculate accurate working minutes without date rollover bugs.

2.2 Leave & WFH Request Management Engine

Built end-to-end leave workflows supporting Annual, Sick, WFH, and Half-Day request types. Real-time AppSheet recalculation bots automatically deduct balances upon line manager approval and prevent zero-allocation submission locks.

- **Instant Balance Deduction:** Automated background triggers immediately recalculate leave ledgers upon approval.
- **Leave Allocation Importer:** Developed CSV import utility for HR admins to seed annual and sick leave balances.
- **Multi-Day Calendar Sync:** Resolved timezone offset edge cases on multi-day leave calendar displays.

2.3 Multi-Region Shift & Timezone Management

Configured regional profiles adapting to regional workweeks and timezone offsets across Dubai (UAE), Doha (Qatar), and Riyadh (KSA). Adjusted shift schedules (e.g., Doha 8 AM – 5 PM) and enabled Sunday clock-in support for Qatar offices.

2.4 Interactive Email Approvals & Notification Engine

Implemented 1-Click Interactive Email approvals in Gmail notifications. Line managers approve or reject requests directly from their inbox without opening the app, accompanied by weekly automated executive digest emails sent on Monday mornings.

2.5 End-to-End Expense Claim Workflow & MoveFinance Bot

Deployed expense submission module requiring receipt uploads and dynamic project selection. Built background MoveFinance bot auto-organizing expense receipts into restricted Google Drive folder paths (FY → Month → Employee Name) under people@blr-world.com.

2.6 HR Administrative Overrides & Security Architecture

Implemented administrative override workflows including HR Check-In/Out Edit buttons, past-date 24-hour attendance deletion locks, security filter profile linkages, and Role-Based Access Control (RBAC) hierarchy mapping for direct report visibility.

2.7 TOIL (Time Off In Lieu) Module

Overtime tracking engine allowing employees to earn and redeem compensatory time off with managerial sign-off.

2.8 Multi-Currency Expense Engine

Multi-currency selector (AED, QAR, SAR, USD, EUR) with automated daily FX rate conversion to home currency.

2.9 Probation User Provisioning Bot

Automated profile creation bot triggering AppSheet user access when employee status shifts from Onboarding to Probation.

2.10 Proactive Document Expiration Alert Bot

Automated notification bot issuing 60/30/15-day expiration alerts for passport, visa, and Emirates ID documents.

3. ITERATIVE FEATURE REQUEST & CHANGE EVOLUTION MATRIX

During pilot testing, several key features underwent multiple feedback cycles and technical changes to achieve final stability. The table below details the top 6 iteratively requested features and their evolution.

Feature Area	Primary Requesters	Initial State & Issue	Iteration & Refinement History	Final Deployed Solution
Attendance Modification & Past-Date Edits	Angelique, Aleksandra, Aaron, Rania	Clock-in locked permanently; users unable to fix mistaken times or forgotten clock-outs.	1. Added remarks field for employee comments. 2. Built dedicated HR Edit button. 3. Implemented 24-hour auto-lock on past dates for payroll security.	HR EDIT BUTTON & 24H LOCK
Reporting Hierarchy & Approvals	Angelique, Sanad, Rania, Hanna, Joanna	Leave & WFH requests not routing to managers; approval buttons missing.	1. Temporary workaround assigning Angelique as universal approver. 2. Fixed security filter & email trigger mapping. 3. Deployed 1-Click Interactive Email Approvals in Gmail.	1-CLICK GMAIL APPROVALS
Multi-Region Timezone & Shift Schedules	Aleksandra, Mayssaa, Sanad	App defaulted to UAE offset; Doha staff unable to clock in on Sundays or seeing wrong end times.	1. Fixed UTC vs local time offset conversion. 2. Configured KSA (Riyadh) and Qatar (Doha) regional profiles. 3. Enabled Sunday clock-in and updated Doha shift to 8 AM – 5 PM.	MULTI-COUNTRY REGIONAL ENGINE
Leave Balance Recalculation & Visual Cards	Sanad, Courage, Reem, Rizalyn	Submitted leaves did not deduct balance immediately; users couldn't see breakdown.	1. Resolved zero-allocation submission block. 2. Created automated sync trigger on AttendanceDaily upon approval. 3. Designed detailed Leave Balance Breakdown cards on dashboard.	AUTO-SYNC & BREAKDOWN CARD
Expense Workflow & Drive Auto-Archiving	Angelique, Jimmy, Fatima, Abed	Receipt upload errors; unstructured file paths; missing project names.	1. Added dynamic project name typing in dropdown. 2. Added Corporate Credit/Debit card claim types. 3. Built MoveFinance Drive bot filing receipts into FY → Month → Employee folders.	MOVEFINANCE DRIVE BOT
Missing Check-in/Out Smart Reminders	Angelique, Hanna, Rizalyn, Rowan, Rania	Users forgetting to check in; initial reminder emails firing for already checked-in users.	1. Set 30-minute post-shift start trigger offset. 2. Added smart exclusions for approved leaves & WFH. 3. Deployed 15-minute grace period with anti-spam rate limiting.	SMART EXCLUSION REMINDERS

4. PHASE 3 STRATEGIC ROADMAP (APPSHEET & APPS SCRIPT AUTOMATIONS)

The table below outlines the **Phase 3 Strategic Roadmap** focusing on advanced native **AppSheet Automation Bots** and **Google Apps Script integrations** to further automate HR operations:

Phase 3 Automation Module	Core Technology Stack	Operational Objective	AppSheet & Apps Script Technical Specification
Proactive Document Expiration Alert Bot	AppSheet Scheduled Bot + Apps Script Mail	Prevent expired passports, visas, and Emirates IDs by issuing proactive automated warnings.	Daily scheduled AppSheet bot evaluating employee document expiry dates and sending 60/30/15-day threshold email alerts.
Automated PDF Payslip & Monthly Summary Generator	AppSheet Template Bot + Apps Script PDF Engine	Automate monthly attendance summary & payslip generation into employee Google Drive folders.	Apps Script automation merging monthly attendance ledgers into individual PDF documents and emailing employees.
Google Calendar Shared Out-Of-Office Auto-Sync	AppSheet Event Trigger + Apps Script Calendar API	Keep team Google Calendars updated with approved employee leaves and WFH requests.	Background Apps Script trigger adding out-of-office calendar events to shared team Google Calendars upon leave approval.

5. ENTERPRISE REMOTE MANAGED SERVICES & EXTENDED WORKFORCE SOLUTIONS

OmmNoMi Extended Remote Workforce Model

ENTERPRISE SOLUTION

OmmNoMi Automation LLP provides enterprise-grade Remote Managed Services and Dedicated Extended Workforce Solutions. We empower forward-thinking organizations to optimize operational efficiency, fortify IT ecosystems, automate intricate workflows, and scale capacity seamlessly—without the capital commitments and supervisory overhead of traditional in-house expansion.

GLOBAL HELPDESK UPTIME

STRATEGIC DIMENSION	TRADITIONAL INTERNAL HIRE MODEL	OmmNoMi Extended Remote Model
Talent Acquisition & Speed	Slower recruitment cycles (60–90 days).	Immediate Deployment: Fully qualified remote specialists deployed instantly.
Financial Commitment	High overhead (benefits, equipment, office space).	Up to 60% Cost Reduction: Zero capital expenditure on benefits or workspace.
Management & QA Burden	Ongoing internal supervisory overhead.	100% Fully Managed: Complete operational execution & quality assurance by OmmNoMi.
Scalability & Agility	Rigid team structures with high friction.	Flexible On-Demand Scaling: Seamless workforce adjustment aligned with business needs.

+
5.1 Enterprise IT & Workspace Governance

IT DIVISION

Complete remote IT division maintaining operational continuity, security compliance, and high availability.

- Google Workspace Admin:** Onboarding/offboarding, RBAC, SSO.
- Email Security:** SPF, DKIM, DMARC anti-spoofing management.
- 24/7 Helpdesk:** Rapid incident response & uptime monitoring.

i
5.2 Custom Process Engineering & Automation

AUTOMATION

Bespoke low-code and open-source software architecture eliminating manual touchpoints.

- ERPNext & Frappe Framework:** Custom modules & workflows.
- AppSheet Web & Mobile:** Digitized field operations & logistics.
- Serverless Cloud Integration:** Apps Script pipelines & real-time sync.

5.3 Dedicated Virtual Workforce & Data Ops

MANAGED OPS

Turnkey back-office management powered by dedicated remote personnel under multi-tier QA.

- **Dedicated Remote Staffing:** Experienced operational associates.
- **Real-Time Data Pipelines:** Record validation & database audits.
- **Multi-Tier QA Execution:** Continuous verification & 100% data integrity.

5.4 Digital Growth & Web Engineering

DIGITAL GROWTH

High-performance web applications and search positioning designed for enterprise growth.

- **Enterprise Web Platforms:** Modern web apps (ommmomi.in standards).
- **Technical SEO:** Technical schema deployment & organic growth.
- **Thought Leadership:** Industry blogging & brand social management.

The OmmNoMi Operational Guarantee

All extended workforce solutions and remote managed services are backed by SLA-driven response times, daily data verification protocols, and dedicated account management to guarantee zero operational disruption.
