FORM VERSION New Client Inquiry Form (v20260717) — 88 Form Questions

AUDIT DATE 24 July 2026	AUDITOR OmmNoMi Coding Agent	STATUS ⚠️ Action Required	PREPARED BY Hardik Sharma ↗
----------------------------	---------------------------------	------------------------------	--------------------------------

EXECUTIVE SUMMARY

A systematic gap audit was performed comparing all 88 questions from the newly updated **New Client Inquiry Form (v20260717)** against the existing production database tables (Client, Insurance, Medication, Payment, and Document). This audit details all mapped fields as well as **38 missing database columns** across personal details, contact consents, EAP program attributes, Medicare insurance, and medication details.

1. CLIENT PERSONAL & CONTACT DETAILS

FORM QUESTION / COLUMN	FORMINTAKE COLUMN	TARGET DB TABLE	STATUS	REQUIRED SCHEMA ACTION
First Name	First Name	Client	MAPPED	Mapped to FirstName
Middle Name	Middle Name	Client	MAPPED	Mapped to MiddleName
Last Name	Last Name	Client	MAPPED	Mapped to LastName

Medication #1, #2, #3 details	Medication Name / Dosage / Symptoms	Medication	MAPPED	Bots split 1st, 2nd, and 3rd meds into Medication rows
Please list additional medications...	Additional Medications Details	Client	MISSING	Add AdditionalMedicationsNotes (LongText) to Client

AUTOMATION ENGINE ARCHITECTURE (PROCESSFORNEWINTAKERESPONSE)

⚡ **Event-Driven Multi-Table Automation Workflow**

The **ProcessForNewIntakeResponse** bot triggers automatically on the **Client** table whenever a new intake response is logged. It executes a 3-stage conditional process:

STEP NAME	CONDITION / TRIGGER RULE	TARGET TABLE & ACTION EXECUTION
Check for Front Insurance Card	ISNOTBLANK([FormIntake].[Front of Insurance Card])	Adds row to Document table (Type: DocType_Insurance, File: Front Image URL)
Check for Back Insurance Card	ISNOTBLANK([FormIntake].[Back of Insurance Card])	Adds row to Document table (Type: DocType_Insurance, File: Back Image URL)
Add Insurance	Runs unconditionally after card checks	Adds row to Insurance table mapping all 26 policy fields (ProviderName, PolicyNumber, MemberID, SubscriberDOB, AdministrativeSex, etc.) using strict type-matched IF (ISNOTBLANK(. . .)) expressions

IMPLEMENTATION PROTOCOL (RULE A2 STANDARD)

1. **Google Sheets Level:**
 - Open Client tab and append physical columns: Suffix, PreferredName, AlsoKnownAs, Pronouns, AdministrativeGender, GenderIdentity, SexualOrientation, Race, Ethnicity, PreferredLanguage, MaritalStatus, ReligiousAffiliation, ConsentMobileVoice, ConsentMobileSMS, HomePhone, ConsentHomeVoice, PreferredContactMethod, ConsentEmail, ConsentTelehealth, TimeZone, UseEAP, EAPProgramName, EAPAuthorizedSessions, HasEAPAuthForm, EAPAuthFile, AdditionalMedicationsNotes.
 - Open Insurance tab and append physical columns: UseInsurance, IsMedicare, SecondaryPlanNotes, SubscriberAddress, SubscriberZip, SubscriberPhone, IsOnlyPlan.
2. **AppSheet Level:** Click *Regenerate Structure* on both Client and Insurance tables.
3. **Column Type Level:** Set exact AppSheet types (Yes/No, Number, File, LongText, Phone).
4. **Data Action Mapping Level:** Update Action for Create New Client Data Action to map these values from FormIntake into Client and Insurance.
