EXECUTIVE DIRECTIVE FOR THE BRAND OWNER

Under the **Asset-Light Third-Party Manufacturing Model**, you do not require factory permits, environmental clearances, or blending plant licenses—those statutory liabilities rest 100% with the contract bottler. However, Indian law holds you as the **Brand Owner & Marketer** strictly accountable for **Entity Registration, Brand Ownership (Trademarks), Packaging Metrology (Rule 27), and Truth-in-Advertising**. This checklist identifies what you must execute, what is already done, and the key strategic decisions needed from you.
