EXECUTIVE SUMMARY

This release note outlines the deployment of key enhancements in Orbit HRMS for Expense Claims management and access control. Built directly within the Expense Claims module, these features allow users to attach image receipts via camera/gallery, mandate proof validation, automatically organize files into Google Drive employee fiscal folders, open files via "See in Drive", select EUR currency, and audit user permissions for Khaled's account.

CONTEXT & REQUEST

Aaron Daniel Ashworth & Fatima Seedat from the BLR team requested updates to the Expense Claims workflow to enable direct camera photo attachments on iOS devices, mandate receipt proof submission, automate backend Google Drive file storage under employee fiscal folders, and add EUR currency support. Additionally, an access control audit was performed for Khaled's account to restore full Employee menu options via People Admin SOP.

ACTION CONFIGURATION — APPSHEET

SETTING / FEATURE	VALUE	EXPLANATION
Receipt Image Attachment	Receipt_Image	Added physical column (Image type) enabling direct camera capture and photo gallery attachment on mobile devices.
Mandatory Attachment Validation	Valid_If / Required_If	Enforced validation logic requiring at least one receipt proof (either Receipt_Image OR Receipt_Files) to save an expense claim.
Automated Drive Routing	Process for Moving to eFinance	Automated AppSheet process/bot that automatically moves uploaded receipt files into the employee's Google Drive folder structure (Employee Folder > Finance > Fiscal Year > Month).
Direct File Access Button	"See in Drive" Action	Added custom AppSheet action button (External: open a website) allowing users and approvers to open the organized receipt directly in Google Drive.
Currency Dropdown Upgrade	EUR Enum Value	Added EUR option to the ExpenseClaims currency Enum dropdown list for multi-currency claim submissions.
User Access SOP Escalation	AppUser & Employee Onboarding	Identified missing employee mapping for Khaled (restricting UI to Resources view) and escalated to People Admin (Rizalyn Bolasco) for standard user creation SOP.

ACCESS CONTROL & ROLES MATRIX

✓ CAN ACCESS EXPENSE CLAIMS & ATTACHMENT FEATURES

VERIFICATION & TESTING STEPS

- ☐ Open Orbit HRMS and perform a manual sync using the top-right circular arrow.
- ☐ Navigate to **Expense Claims** and tap + Add.
- ☐ Verify that Receipt_Image (Camera icon) and Receipt_Files (File picker icon) both appear, and confirm that saving without at least one attachment triggers a validation alert.
- ☐ Select **EUR** from the Currency dropdown list and submit the claim.
- ☐ Open the created claim detail view and click "**See in Drive**" to verify that the file opens in its structured Google Drive folder.

HELPFUL FAQs

Where are receipt files stored in Google Drive?

Receipt files are automatically organized under Employee Folder > Finance > Fiscal Year > Month.

Is attaching a receipt mandatory?

Yes. Attaching at least one receipt proof (either a camera photo or a PDF/file attachment) is required to save the claim.

What does the "See in Drive" button do?

It provides a direct 1-click URL link to open the renamed and organized receipt file directly in Google Drive.

How to access Khaled's Clock In/Out feature?

The People Admin team will execute the standard user creation SOP to assign Khaled's employee role, restoring full sidebar navigation.
